NWS Advisories in Effect; Heavy Rainfall Remains a Possibility Over the Weekend

The following National Weather Service (NWS) Guam Weather Forecast Office advisories are in place:

An **airport wind advisory** remains in effect for the Guam International Airport until 6 p.m. this evening. Winds at 20 knots, with frequent gusts to 30 knots, are expected.

A **red flag warning** remains in effect for Guam until Friday evening. A red flag warning means that critical fire weather conditions are either occurring now, or will shortly. East winds of 15 to 25 mph with gusts to 35 mph are expected during the afternoons. The highest threat is expected for central and southern Guam during the daytime hours. Any fires that develop will likely spread rapidly. Outdoor burning is not recommended.

A **high risk of rip currents** remains in effect for Guam, Rota, Tinian, and Saipan through late Friday night. Dangerous rip currents are expected along east facing reefs. Inexperienced swimmers should remain out of the water due to dangerous conditions. If caught in a rip current, do not swim against the current. Swim in a direction following the shoreline, face the shore and call or wave for help.

A **small craft advisory** is in effect for in effect for the coastal waters of Guam, Rota, Tinian, and Saipan until 6 a.m. Monday. East winds of 15 to 25 knots, with gusts up to 30 knots, and seas of 7 to 9 feet are expected. Inexperienced mariners, especially those operating smaller vessels, should avoid boating in hazardous conditions.

NWS continues to monitor Invest Area 95W, southwest of Chuuk, near 4 degrees north latitude, 148 degrees east longitude. It is expected to track west-northwestward, toward eastern Yap State in the coming days. There remains uncertainty for exactly how much wind and rain is expected for the Marianas this weekend, but showers will likely increase on Saturday.

The Offices of Guam Homeland Security and Civil Defense (GHS/OCD), in coordination with NWS, will continue to monitor all systems in the region and provide updates.
